

New One-Step Rapid h-FABP Diagnostic Test

A Highly Specific Aid in the Early Detection
(≤ 3 Hours) of Acute Myocardial Infarction

Easy to Use

Simply add two drops of whole blood or serum.

Rapid

Results in 3 minutes (serum).
Results in 15 minutes (whole blood).

Convenient

Use and store at room temperature.
12-month shelf life.

Advantages

- ✦ Earlier diagnosis
- ✦ Higher specificity and sensitivity (see Fig. 1)
- ✦ Higher reliability (see Fig. 2)

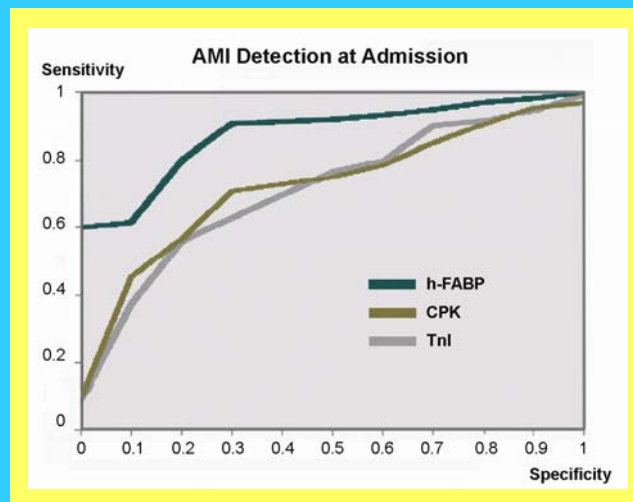

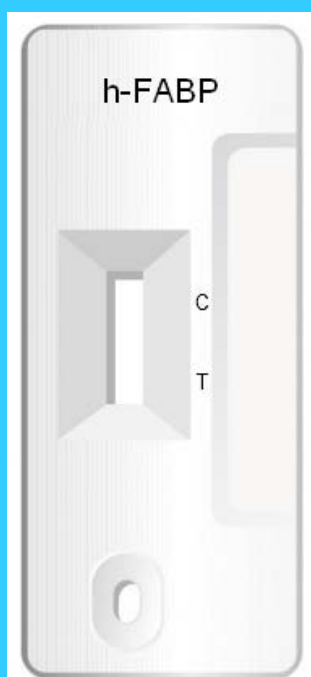

Fig. 1: Comparison among h-FABP, CPK, and TnI in sensitivity (Y axis) and specificity (X axis)

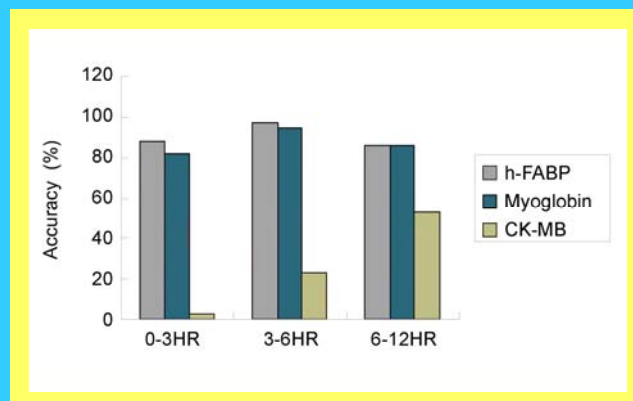

Fig. 2: Reliability comparison among h-FABP, Myoglobin, and CK-MB
